

BCTV ACCOUNT AND CHANNELS CREATION.

BCTV: this in meaning is Broadcasters Community Television.

One-User-One-Account, and, One-Account-Multiple-Channels. Meaning, every user can only create and own just one account, but can create multiple channels under a single account created.

The primary user accounts are created with real/legal names of the account holders. The primary account shall have the following set up requirements:

*REAL NAME [First and Last Name]: this is required. Automatically made public.

*CAMERA/NICK NAME: this is optional. Automatically made public.

*DATE OF BIRTH: this is required and public, but the year of birth is not made public by system default. User can keep the entire DOB info private or public.

*PROFILE PHOTO: this is required and made public.

*SHORT BIO/Tell Us About You: this is required and it's automatically made public.

*HOBBIES: this may be skipped at the point of registration, and can be fulfilled later. Automatically made public.

*ACTIVE EMAIL: these is required for database purposes.

CREATING BCTV CHANNELS:

User by choice shall be able to create just one channel or multiple channels under one primary account created. While setting up new channels, user shall be able to create BCTV channel's profile in the order stated below.

*New BCTV Channel Name.

*New BCTV Channel Description.

*New BCTV Channel Profile Photo.

*New BCTV Channel Handle ID.

_The above documentations are required for every new individual channel created.

*The frontend button that prompts user to like posted content across the system is titled; APPROVE

*The frontend button that prompts user to dislike posted content across the system is titled; DISAPPROVE

_The Approve and Disapprove feature is turned on by system default setting. However, BCTV content creator or channel owner shall be able to either activate or deactivate the feature on any given content upload.

*Edit Feature: Every user accounts, channels, and content created or uploaded across the system shall be editable to add, remove or replace items.

*User shall be able to upload pre-recorded video files on every channel created.

_Every user accounts and channels created shall generate URL that can be shared.

_Every content uploaded shall have timestamps and the URL generated can be shared.

_User shall be able to write captions for every video files uploaded.....REQUIRED.

_User shall be able to write descriptions for every video files uploaded.....OPTIONAL.

_Video files uploaded can be reported, can get Approve or Disapprove by registered users.

*User shall be able to livestream on every qualified individual channel created and the livestream URL can be shared respectively.

Livestream Limitation:

*Only the “first” channel created under a given account by the user shall enjoy free livestreaming feature with unlimited pre-recorded content uploads.

*Subscription: Extra multiple channels created only on paid subscription packages shall enjoy free livestreaming, and unlimited pre-recorded content uploads. Just like the first free channel created.

*No Subscription: extra multiple channels created under a given account are without livestream feature. Shall only enjoy free pre-recorded content uploads up to 500 hours maximum per channel.

*Storage Limit: the extra video files per channel beyond the stated limit shall require a paid subscription for more storage space, or, user shall be able to delete old video files already uploaded to accommodate newest content upload.

BCTV Channels Subscription:

Registered users shall be able to subscribe for free to different channels of choice across the platform. The list of all channels each registered user subscribe to shows under a dedicated “Tab Button” under the primary account of each account owner.

BCTV System Timestamps:

The system shall display timestamps for account creation, channel initiation, content uploads, and comments. Meaning, it shall be made public, that is, information about how long ago an account was created, how old is a given channel created, how long ago was a comment made etc.

Statistics:

The BCTV system shall show and keep the record number of subscribers onto every channels created, Approvals, Disapprovals for every posts across board, and also comments under each posts for every channel.

BCTV CHANNEL CATEGORIZATION:

Primary account owner when creating new channels shall be able to categorize each channel under the options the system makes available below.

Public Service Announcement _ Shorts Feature:

*PSA Shorts _ _ this shall be Tag/Title for the referred dedicated Tab button under the individual account created across the system.

_Under the “PSA Shorts” feature, user shall be able to upload video files not more than 120 seconds at a time.

BCTV DASHBOARD FEATURES:

*User is able to know locations of subscribers on channels created, not by names but on aggregate the numbers of subscribers onto each channel and from what location.

*Multiple channels created under a given account are not listed publicly. Meaning only the account owner sees the multiple channels created. Visitors shall only see channels individually and relate accordingly.

*User gets info/updates about performance of channels and content, both showing on dashboard and receive via registered Email.

BCTV User Account Management:

Based on reports/violation of community rules of engagement, the BCTV System Administrator can temporarily suspend or permanently deactivate accounts, keeping them hidden from public view. When

a given account is either suspended or deactivated, every content thereon goes away with it. Although hidden from public view, but still visible on the backend and marked as either suspended or deactivated on the outside/frontend.

*BCTV System Administrator is able to send individual or group Email to registered users.

SECURITY.

2FA shall be part of the entire system designs and development.

Although, certain logging credentials shall give access onto the primary account created. Also, every individual channel created under the primary account shall have something like a “PIN” or secret code to access channels created respectively. This in case of giving access to someone else/admin person to help manage a given channel from a different location, but primary account owner shall need no secret code to access all channels under the account.

*ADMINISTRATION PORTAL FEATURE.

There shall be a portal system where everything, without limitation to the accounts and channels on the entire platform can be managed accordingly.

ACCOUNT AND USER VERIFICATION FEATURE.

Some selected and qualified accounts/users in existence across the system shall be verifiable if and when the related accounts meet up with requirements for such honors. This is an action that only the system administrator can make happen from the admin portal by issuing relevant badges to that effect and checkmarks varying in colors. Then, verification checkmark shall reflect immediately on the frontend and as related to the concerned account/user.

BADGES AND CHECKMARKS.

The verification checkmarks of active accounts in existence shall be of two varying types. One for the in house accounts/users and one for the non in house accounts created.

*In-house Accounts/Users: these are accounts officially created and managed by us, the platform itself. Meaning, all official accounts that belongs to us as owner and operator of the platform.

*Non In-house accounts/users: these are accounts created and owned by other users outside our team or not part of the primary managers of the platform.

GREEN BADGE CHECKMARK “private”.

This green color Verified User Badge checkmark shall be reserved only for the in-house accounts created, managed and owned by us officially as operator of the platform.

BLUE BADGE CHECKMARK “public”.

The blue color checkmark shall be a type of Verified User Badge reserved only for the qualified public accounts existing on the platform.

_ASSIGNING ACCOUNT ADMINISTRATORS

NB: This part of the registration may be fulfilled immediately or skipped until later, wherein the primary account owner could assign 3 persons to help co-manage the account.

_The details below are further backend instructions the account owner shall find on the screen in the process of fulfilling the account creation process.

*_ASSIGN 3 ADMINISTRATORS FOR YOUR ACCOUNT.

This is optional, and you can assign your own Admin officers right away or later, but it’s absolutely possible to share the responsibility of managing your account with up to 3 persons/handlers you trust.

*ASSIGN ADMINISTRATOR 1

_First Name: ‘required’.

_Last Name: ‘required’.

_Active Email: ‘required’.

_Submit

*ASSIGN ADMINISTRATOR 2

_First Name: ‘required’.

_Last Name: ‘required’.

_Active Email: ‘required’.

_Submit

***ASSIGN ADMINISTRATOR 3**

_First Name: 'required'.

_Last Name: 'required'.

_Active Email: 'required'.

_Submit

*Each administrator assigned must be a registered user on the platform, and shall get both notification and confirmation Email as regard the channel management assignment, and shall be able to create login details to always sign-in to the channel assigned.

*Alternatively, the system can just use the existing registration details of the new admin officer being assigned, since the user already has an account on the platform.

*The account owner shall be able to give permissions onto the channels assigned, and shall be able to discard and manage the admin officers, and shall be able to decide roles of the channel managers.
